It seems the cron module does not handle the user name property properly #3933

`bsd` `bug`

berenddeboer commented on Aug 23, 2013

I have two lines:

...

The second line should go to the logcheck user, but wipes out the root user entries instead, i.e. the previous entry.

What OS/version of ansible was this on?

I tested on a Fedora 17 system using the HEAD of the devel branch, and was unable to reproduce this:

...
